QuickSleeper Intra-Osseous Anaesthetic System Training Sessions

General Medical will be hosting training sessions for the Quicksleeper system as follows (9am-2pm):

Friday 16th December 2011 - Hartlepool, County Durham

Friday 13th January 2012 - Birmingham

The Quicksleeper system has been developed over the past ten years and provides virtually pain free local infiltration and intra-osseous anaesthesia. The advantages for the dentist are

- maximum concentrations of anaesthetic where it is needed, 100% effective in every case,
- ability to use high concentration vasoconstrictors for inflamed tissues (pulpitis) with no risk of necrosis
- simple clinical pen-grip injection technique
- ability to anaesthetise 2 to 8 teeth with one injection
- instantaneous anaesthesia, no lag time, no failures - time saving

For the patient there is a pain free protocol from start to finish, no soft tissue numbness when intra-osseous approach used, reduced chair time. Visit www.dentalthitec.com for more information.

To reserve a place on a course simply return the application slip with your cheque made payable to General Medical, we look forward to seeing you there. *Course numbers strictly limited*

4 hours verifiable CPD

Please reserve ____ place/s at £125.00 plus VAT - Total £150.00 (includes refreshment) for the Quicksleeper course on:

- Friday 16th December 2011 - Hartlepool, County Durham
- Friday 13th January 2012 - Birmingham

(cheques payable to General Medical)
