## QuickSleeper Intra-Osseous Anaesthetic System Training Sessions

General Medical will be hosting a training session for the Quicksleeper system as follows:

Date: Friday 29<sup>th</sup> January 2010

Time: 9.45am - 2pm

Speaker: Dr Andrew Johnson

Venue: Holland House Dental Practice, 69 Wide Bar Gate, Boston, Lincolnshire, PE21 6SG

The Quicksleeper system has been developed over the past ten years and provides virtually pain free local infiltration and intra-osseous anaesthesia. The advantages for the dentist are

- maximum concentrations of anaesthetic where it is needed, 100% effective in every case, ability to use high concentration vasoconstrictors for inflamed tissues ( pulpitis ) with no risk of necrosis
- simple clinical pen-grip injection technique
- ability to anaesthetise 2 to 8 teeth with one injection
- instantaneous anaesthesia, no lag time, no failures - time saving

For the patient there is a pain free protocol from start to finish, no soft tissue numbness when intra-osseous approach used, reduced chair time.

For a preview of the possibilities of the Quicksleeper system visit the manufacturers website at [www.dentalhitec.com](http://www.dentalhitec.com) and learn more about this incredible product.

To reserve a place on either course simply return the application slip with your cheque made payable to General Medical, we look forward to seeing you there.

*Course numbers strictly limited*

---

3 hours verifiable CPD

Please reserve \_\_\_\_ place/s at £125.00 plus VAT - Total £146.88 (includes refreshments)
